

SMART DAIRY PLATFORM

AI-Powered Dairy Management System

SYSTEM OVERVIEW

Smart Dairy is an innovative AI-powered platform designed to revolutionize dairy farm management through advanced artificial intelligence, computer vision, and data analytics. The system provides comprehensive solutions for cow health monitoring, feed optimization, disease detection, and production analytics.

KEY FEATURES

- AI-Powered Disease Detection using Computer Vision
- Personalized Feed Optimization based on cow characteristics
- Bilingual AI Assistant (English/Swahili) for farmer support
- Real-time Health Monitoring and Analytics
- Production Prediction and Optimization
- User-friendly Web Interface

TECHNICAL SPECIFICATIONS

Backend Technology: Django 5.2.7 (Python)

Frontend: HTML5, CSS3, JavaScript, Bootstrap 5.3.0

AI Integration: Google Gemini AI, Computer Vision

Database: SQLite (Development), PostgreSQL (Production)

Deployment: Cloud-ready architecture

Security: Django authentication, CSRF protection
